

Height-adjustable support block up to 1,5t

Adjustable distance between the rolls of 200 mm, 155 mm and 110 mm

Versatile use

The height adjustable support block simplifies the processing of different containers. Its solid construction can support up to 1500 kg and can be used for diameters from 30-400 mm. Almost indispensable for circular weld seams and long work pieces.

Model	Support Block
Height	470 - 750 mm
Max. load	1500 kg
Roller diameter	101,6 mm
Height adjustment	manuell
Workpiece diameter	30 - 400 mm
Weight	24 kg
Item no.	71850010

Features

- Device for the support of containers and cylindrical workpieces.
- Very solid.
- Infinitely adjustable in height (manually).

Height-adjustable support block up to 1,5t
